DOM-1 Dissolved Ozone Meter is the quickest & least expensive way to measure your dissolved ozone levels. Ozone is used for the disinfections of swimming pool water and in many other water treatment systems. In all cases, accurate measurement of ozone residual is essential for the control of the system or to ensure that the ozone has been removed. DOM-1 Dissolved Ozone Meter is ideal for every application. The instrument is equally suitable for bench or field use. For maximum portability, the Dissolved Ozone Meter is supplied in a hard case. It is complete with test tubes, DPD tablets and full operating instructions.

Features:

- Low cost
- Simple use
- Quick reading
- 100 tests in one kit
- Ready to use upon delivery
